FOURTH SUNDAY OF EASTER

11TH MAY 2025

Good shepherd Sunday and A day of prayer for vocations

Today is; The Good shepherd Sunday. The readings, invite us to reflect on the profound image of Jesus as the Good Shepherd, who knows his sheep and lays down his life for them. These readings converge on the powerful image of Christ as the Good Shepherd, a figure of love, protection, and intimate connection with his flock.

What a coincidence! As today's readings invite us to reflect on the image of Christ as a good Shepherd, Christians all over the world, are eagerly awaiting to see what Pope Leo XIV will bring into the Lord's Vineyard. As a Shepherd entrusted with the responsibility of 'leading' the church, will he act as a Good Shepherd? Will he be a light of the nations, so that the salvation of the Lord may reach to the ends of the Earth?

As Christians in Easter season, the church invites us to follow in the example of Christ the Good Shepherd. He who was slain is now our shepherd. He will lead humanity to the springs of living water. Like Christ, are we ready to radiate light and life to many of our brothers in need? Many are searching for the shepherd's voice; am I one of these voices? Can I be one of them?

As we await to see what Pope Leo XIV brings along, let us pray that the Holy spirit will guide and bring about One shepherd, One Church and one voice spreading about Love, Reconciliation and Integrity. May we also pray that the young men and women hear and respond generously to the Lord's call to the priesthood and religious life and that the church will always have pastors who care for God's people with the heart of Christ himself.

Top Ten Ways to Help Pollinators: Manage and plant native hedgerows for biodiversity

The more blossom your hedgerow has in Spring, the better it is for biodiversity. Allow hedges to grow into a natural A-shape profile rather than a neat box shape.

Why: Native hedgerow plants such as Hawthorn (also called Whitethorn), and Blackthorn flower early in Spring, providing vital food for wild bees when they emerge from hibernation. Birds and mammals eat their berries later in autumn.
